## AIKIDO.34 LIGHT, APPROVED BY MERCEDES-BENZ AND SMART

Dear Butler Partner,

We are pleased to announce our **Aikido.34 Light** has been officially homologated by **Mercedes-Benz and Smart**.

The homologation prizes the ergonomic design and the great versatility and flexibility of our new leverless tyre changer, but furthermore expresses the high suitability to manage **Run-Flat** and **low profile tyres** without running the risk to damage even the most sophisticated rims.

Created to operate on reverse rims without using extra flanges as well as standard wheels, able to accurately control both the speed-rotation and the bead breaker movement, capable to mount and demount even the hardest beads thanks to its innovative and patented head, **the latest Mercedes-Benz and Smart approval testifies the Aikido.34 Light reliability and top-range performances.**
